** Volunteer readers have two options available. After passing a reading audition, readers can:

1. Come to the studio to read during studio hours, or
 2. Read from home, if they are and have the following:
 - a. Must be a computer user familiar with the use of file transfer protocol
 - b. able to trouble shoot computer issues that may come up during file saving or sending
 - c. *using a 2007 or later PC running XP, Vista or windows 7
 - d. have 6 GB free space on computer
 - e. have or are willing to buy a computer microphone
 - f. have a DSL, cable, or fiber optic internet connection
- ? We have volunteers that use Mac's, but they must have their own recording program (audacity or garage band), and be able to trouble shoot any issues with it since we do not use those programs.
